

Preconstruction Meeting FAQ's

Are the documents from the meeting available electronically?

Yes. The E-documents have links within them; the links make it easy to reference things within the E-documents.

Can you start this process before you get notice to proceed?

Yes, if you are sure you have the contract. If you have the job, then you can have the discussions.

Will this process be used for Maintenance Contracts?

It is up to the DOT Area Offices.

Will this have an effect on partnering currently used?

This is very similar to partnering; it probably will not be needed with the new process.

Will environmental submittals still be DOT's function (i.e. SWPPP)?

Yes, DOT will do the SWPPP and major documents. But, the Contractor still needs to submit the information needed on the documents prior to construction.

How would a DOT 3rd party administrator fit into the swim lanes?

The consultant would be like the Area Engineer; so they would be in the Area Office Lane.
