GRIP-FLEX AIRPORT INSTALLATIONS

AIR FORCE ACADEMY, COLORADO 2018

Byron,

It was good to visit with you at the 4 States Airports Conference. You had mentioned that you would appreciate it if I would put in writing my comments on the gripflex coating at the Norfolk, Nebraska airport. It's been nearly 5 years and the gripflex top coat is holding up well. We have noticed that the blackness of the color has not faded since installed. It is significantly noticeable from the air and with snow and cold during Nebraska winters, when the gripflex runway and taxiways are plowed and the sun is shining, the black top coat accelerates ice melting. Our notams for braking action are always cancelled sooner on the gripflex coated runway, which in turn, promotes traffic and business at our airport.

Regards,

Terri Wachter, Mgr. Norfolk Regional Airport Norfolk, Nebraska
