

**DEPARTMENT OF
TRANSPORTATION**

Public Information

Project Location: S.D. Highway 50 & S.D. Highway 48
Interchanges with Interstate 29

Project Description: Replace Bridge Structures, Approach Grading, Modify Ramps, Modify Intersection, and Resurface Rest Area.

Project Number: IM-B 0291(135)26, Union County, PCN 08KM

Structure Numbers: 64-006-160, 64-008-205, and 64-003-160

Public Meeting Information @

<https://dot.sd.gov/projects-studies/projects/public-meetings/#i29-08km>

The South Dakota Department of Transportation gives public notice of its policy to uphold and assure full compliance with the non-discrimination requirements of Title VI of the Civil Rights Act of 1964 and related Nondiscrimination authorities. Title VI and related Nondiscrimination authorities stipulate that no person in the United States of America shall on the grounds of race, color, national origin, religion, sex, age, disability, income level or Limited English Proficiency be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance.

Any person who has questions concerning this policy or wishes to file a discrimination complaint should contact the Department's Civil Rights Office at 605-773-3540.

Public Meeting

Project Location: I-29 – S.D. Highway 50 & S.D. Highway 48 Interchanges over I-29
 Project Number: IM-B 0291(135)29
 Date: Tuesday, April 14, 2020

Krista May, PE
 Infrastructure Design Group, Inc.

1

Mission Statement

We provide a safe and efficient public transportation system.
<https://dot.sd.gov/>

2

Purpose of the Meeting

- Involve the public in the planning and design process
- Provide a project overview
 - ✓ Background information
 - ✓ Proposed project
 - ✓ Project schedule
- Gather input and comments

3

Project Limits

4

Background Information SD 50

Grading and structures in 1961

Last Surface Improvements in 2025

5

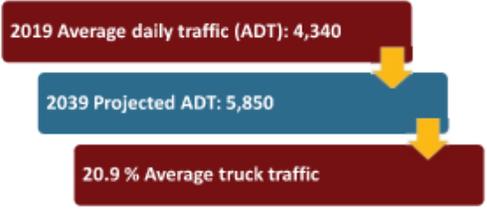

Background Information SD 48

Grading and structures in 1962

Last Surface Improvements in 2022

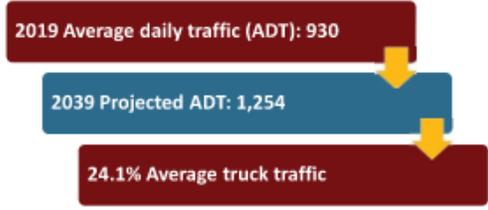

6

Traffic Data and Information SD 50

Proposed Improvements – SD 50

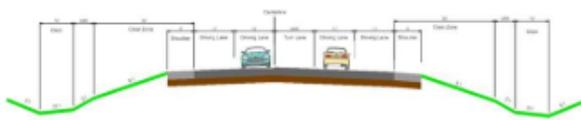

13

Proposed Improvements – SD 48

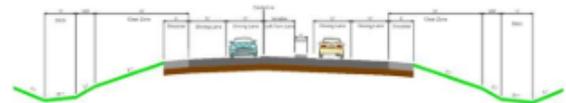

14

Proposed Typical Section SD 50

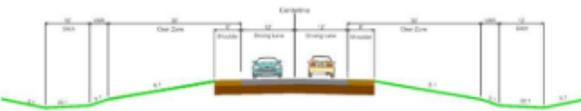

15

Proposed Typical Section SD 50 from southbound on/off ramps to 2nd Coffee Cup entrance

16

Proposed Typical Section SD 48

17

Access Management

Manage location and number of access points. Provide safe, efficient access to streets and highways by relocating, combining, and eliminating access points.

✓ See handout

18

Right of Way (ROW)

Existing Width varies 100-220 feet

Purchase additional ROW as needed

Temporary Construction easements as needed

See handout

19

Encroachments

Private property in public ROW

Federal Highway regulations for safety

Examples

- Signs
- Private use (parking)
- Landscaping

Notification

Owners of encroachments will be notified by the Yorkton Area Office.

See handout

20

Utility Coordination

Some utilities may need to be relocated.

Utility companies negotiate easements with landowners.

AT&T Transmission
 Clay Rural Water System
 Clay Union Electric Corporation
 Diasepak
 H&H Enterprises
 Long Lines Broadband
 Midco
 SDN Communications
 Lumen/Century Link
 City of Vermillion
 Coffee Cup

See handout

21

Environmental, Social, and Economic Concerns

This project is being developed in accordance with applicable State and Federal environmental regulations.

- National Environmental Policy Act of 1969 (NEPA), as amended.
- Section 106 of the National Historic Preservation Act

Section 106 of the National Historic Preservation Act requires Federal actions to take into account the effects of project undertakings on historic properties. The public is invited to provide information on any known historic properties (archaeological sites, historic buildings, historic bridges, etc.). The project will be developed to avoid adverse impact to Junction City Rest Stop Tipi which is eligible for the National Registry of Historic Places.

22

Environmental, Social, and Economic Concerns (Slide 2)

- **Section 404 of the Clean Water Act**
 Federal regulations require that unavoidable wetland impacts caused by highway construction be avoided, minimized, or mitigated. If you are interested in creating or restoring wetlands on your property, please complete the Wetland Mitigation Registry Form in the handouts.
- **Section 4(f) of the USDOT Transportation Act of 1966**
 Project development will include all possible planning to avoid and minimize harm to publicly owned parks, recreational areas, wildlife & waterfowl refuges, or public & private historical sites. There are no known publicly owned parks, recreational areas, or wildlife refuges located adjacent to the project. The Junction City Rest Stop Tipi is a historic site protected under Section 4(f).

23

Environmental, Social, and Economic Concerns (Slide 3)

- **Section 7 of the Endangered Species Act**
 The project will be coordinated with the U.S. Fish and Wildlife Service to determine effects to the following species that are known to occur in Union County:
 - Piping Plover
 - Rufa Red Knot
 - Pallid Sturgeon
 - Monarch Butterfly
 - Suckley's Cuckoo Bumble Bee
 - Western Prairie Fringed Orchid

Efforts are proceeding to ensure this undertaking will not adversely affect listed species in Union County.

24

Construction Traffic Control

25

Landowner Meetings

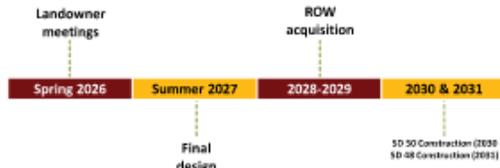

Discussion Items

- Driveway locations/widths
- Fences
- Drainage
- Trees
- Temporary construction easements or ROW acquisition

26

Tentative Project Schedule

Dependent on federal funding
Estimated cost: \$33.5 million

27

Questions or Comments

- Deadline: Wednesday, April 29, 2026
- Submit To:
 - Krista May
 - Infrastructure Design Group, Inc.
 - 116 W. 69th Street, Suite 200, Sioux Falls, SD 57108
 - KristaM@infrastructureidg.com

Access Management

South Dakota's Commitment to Safety and Smart Investment Decisions in Transportation

What is Access Management?

Access Management is the process of providing highway entrances only at locations where they can be provided safely and efficiently.

Consider that each access point added to an undivided highway in an urban or suburban area increases the annual crash rate by 11 to 18 percent on that highway segment. In rural areas, each added access point increases the annual crash rate by seven percent. Overall, driveway-access crashes alone cost South Dakota approximately \$36.5 million each year.

Each additional access point also contributes to congestion. The more driveways on a street the more places where people are slowing, changing lanes, and turning. A five-lane street can quickly become a parking lot when there are many driveways in each block. When that happens, our valuable transportation investments are wasted and access to adjacent businesses is restricted.

Controlled access facilities are segments of highway where either no access or only limited access to the highway is allowed. Interstate highways are an example of controlled access facilities where no access to the highway is allowed.

Good access depends on the following:

- Limiting the number of conflict points (places where there is a potential for crashes)
- Separating conflict areas
- Reducing interference with through traffic
- Providing good on-site circulation and storage
- Properly spaced traffic signals

How does Access Management affect businesses?

Studies have shown that access management can provide three benefits to businesses adjacent to highways:

- Making sure that drivers can get in and out of businesses without being blocked by other traffic
- Making the highway more attractive by reducing congestion
- Extending the business' effective service area by reducing travel times

These benefits come not from having many driveways, but by having well-planned, well-located, high-capacity access points on the highway.

Even skeptical business owners have found that proper access management results in an improved business climate, as customers can easily get in and out of their business establishment.

For more information, please contact:

Joe Sestak
Access Management Engineer
1306 West 31st St.
Yankton, SD 57008

E-Mail: Joseph.Sestak@state.sd.us

DEPARTMENT OF TRANSPORTATION

Right of Way Information

Individual Landowner Meetings

During the early stages of the project's design, SDDOT will schedule a meeting with individual landowners having property adjacent to the project. See the following page for an explanation of the landowner meeting.

Property Acquisition Offer

After the project construction plans have been prepared and the right of way limits have been established, you may be contacted by an appraiser or negotiations agent to visit with you for that portion of your property that is needed for construction of the project. Your property will be valued, and a written offer presented to you by a negotiating agent who will contact you for an appointment to make the written offer.

Relocation Assistance Program

This program provides a variety of services and payments to owners and tenants who have personal property affected by the right of way being acquired for the project.

Relocation payments are in addition to payments made for the real property being acquired. To preserve your eligibility for payments, do not move property until you have received a written relocation offer or have contacted John Keyes of the SDDOT Right of Way Program in Pierre. His phone number is 605-773-3746. Anyone not satisfied with the relocation offer made to them may appeal using the procedures described in the Relocation brochure.

The landowner may be reimbursed for various fair and reasonable incidental expenses that may be incurred during the transfer of property to the State depending on impacts to personal property and qualifications.

Right of Way Information Brochures

Two brochures "Better Roads brochure" and "Relocation Assistance brochure" have been prepared which explain the SDDOT's Right of Way process. They provide information on your rights regarding the acquisition of your property and the benefits available to you with regard to the Relocation Assistance Program. These brochures are available at this meeting on the "Sign-in" table. Please feel free to take a copy of each with you. These brochures are available at the following SDDOT website: <https://dot.sd.gov/inside-sddot/forms-publications/brochures>

DEPARTMENT OF TRANSPORTATION

Individual Landowner Meetings

The purpose of this meeting is to provide you with an opportunity to comment on various issues pertaining to the design of this highway project as it relates to your property.

The following topics will be discussed at the meetings. Please note that not all topics will apply to every property owner.

- Permanent purchase and/or temporary use of your property.
- Locations and widths of entrances to your property: The standard South Dakota Department of Transportation (SDDOT) entrance-width for rural highways is 24 feet. Note: In general, existing entrance widths along rural State Highways are 24 feet or smaller. A maximum width of 40 feet is allowed at locations where it is deemed appropriate and necessary. Entrances in urban areas can vary from 16 feet to 40 feet.

The goal of the SDDOT is to provide property owners located adjacent to the project with the access they need, and at the same time, enhance highway safety and reduce project costs. In some instances, the SDDOT may seek to combine duplicate entrances. For example, if your property has two or three entrances to the same property that are located close to each other, we would ask you to assess your current entrance needs and consider one entrance location that will meet those needs.

- Permanent fencing adjacent to the highway: SDDOT's fencing policy allows for the replacement of all disturbed fence with like-kind fence.

Two fence types are typically installed: **Type 2:** 4-strand barbed wire with 8-inch wire spacing, and **Type 6:** 32-inch woven wire with 1 strand of barbed wire on the bottom and 2 strands of barbed wire on the top. Page 12 of the "Better Roads brochure" contains added discussion of your permanent fencing options. This brochure will be available at the meeting.

- Temporary fencing adjacent to the highway: Do you anticipate having livestock in pastures located adjacent to the proposed project during highway construction activities?
- Are you aware of any waterlines, drain fields, septic tanks, underground storage tanks, underground power lines, etc. that are located adjacent to the project and may be impacted by construction activities?
- Are there any highway-related drainage or flooding problems located along your property or elsewhere along this section of highway?
- Possible sites for gravel and additional fill material: Are you aware of potential material available for construction that might be located adjacent to the highway?
- Temporary access during construction activities.

Please review your property and be prepared to discuss the above issues, as well as any other issues that you feel are unique to your property. No offers to acquire property will be made at these meetings since revisions to the plans may occur from your input.

DEPARTMENT OF TRANSPORTATION

Encroachments in ROW

Federal Regulations (CFR 23.1) require that the State Highway Department (SDDOT) will be responsible for preserving such ROW free of all public and private installation, facilities, and encroachments.

No improvements shall be allowed to remain in the ROW unless they are deemed in the best interest of the public and will not impair the highway or interfere with the free and safe flow of traffic.

Encroachments are any private property or improvement in the public ROW that is not approved by permit such as:

- Landscaping items
- Fence
- Signs
- Buildings
- Etc.

SDDOT Staff will survey the project limits to identify all encroachments. Prior to the project being let to contract, landowners will be contacted by the SDDOT or City Government regarding how each encroachment will be addressed or handled. If it is determined that the removal of an encroachment is required, it will be the landowner's responsibility to remove the encroachment.

For additional information, please contact:

Greg Rothschadl
Area Engineer
SDDOT Yankton Area Office
1306 W. 31st Street
Yankton, SD 57078
Phone: 605-910-7175
E-Mail: greg.rothschadl@state.sd.us

Environmental, Social & Economic Impacts and Advanced Utility Coordination

Environmental, Social & Economic Impacts

- Project will comply with all state and federal environmental regulations.
- No splitting of neighborhoods will occur because of this project.
- Project will be coordinated with the following state and federal agencies:
 - SD Dept. of Environment & Natural Resources
 - SD Dept. of Game, Fish & Parks
 - US Fish & Wildlife Service
 - State Historic Preservation Office
 - US Forest Service
- For additional information, please contact:

Chad Babcock
Environmental Manager
SDDOT Office of Administration
700 E. Broadway Ave.
Pierre, SD 57501
Phone: 605-773-3309
E-Mail: Joanne.Hight@state.sd.us

Advanced Utility Coordination

Highway projects may require adjustments or relocation of existing utilities located along or crossing the highway project. The SDDOT has an "Advanced Utility Coordinating Process" in place that addresses all existing utility involvement. This process involves meeting with the utility owner and project designers to **review** any conflicts and determine the most cost-effective option of changing the design to avoid the existing utility or adjusting the utility. If the utility is required to relocate, all replacement utility easement acquisition and relocation work will be addressed and coordinated between the landowner and the utility company.

- For additional information, please contact:

Krista May
Infrastructure Design Group, Inc.
116 W. 69th Street, Suite 200
Sioux Falls, SD 57108
E-Mail Address: KristaM@infrastructuredg.com

**DEPARTMENT OF
TRANSPORTATION**

Wetland Mitigation Registry Form

Federal regulations require that unavoidable wetland impacts caused by highway construction be mitigated. Examples of acceptable wetland mitigation include:

- Wetland creation
- Wetland restoration – plugging an existing, drained wetland.
- Wetland enhancement - adding buffer around an existing wetland.

The South Dakota Department of Transportation (SDDOT) may participate in the cost of wetland creation/restoration/enhancement, if the wetland can be used to mitigate wetland impacts caused by highway construction.

If you are interested in creating, restoring, or enhancing wetlands on your property, please complete the attached form and mail to:

Chad Babcock
Environmental Manager
SDDOT Office of Administration
700 E. Broadway Ave.
Pierre, SD 57501

Your name will be added to the SDDOT Wetland Mitigation Registry and a SDDOT representative will contact you with additional information.

Yes, I am interested in assisting the SDDOT to mitigate wetland impacts by creating or restoring wetlands on my property.

Name: _____

Address: _____

Phone #: _____ **Email:** _____

Location of property: _____ **1/4 of Section** _____

Township _____, **Range** _____, **County** _____

Please note: Completion of this form does not commit either you or the SDDOT to a mitigation project. It is a statement of interest only.
