

Update in Road Design Manual Chapter 10 – Roadside Safety

Summary of the changes are as follows:

Page 10-46 – Added the second paragraph and 5 bullets to provide additional guidance on the design of high tension cable guardrail.

Page 10-47 – Added “placement within sag vertical curves” to the list of conditions that may justify closer post spacing of high tension cable guardrail.

Page 10-48 – Added the second paragraph and 3 bullets to provide additional guidance on the use of high tension cable guardrail on vertical curves.

Page 10-50 – Added the third paragraph, 6 bullets and Figure 10-17a. The new text and figure provide guidance on placement of median high tension cable guardrail.

Page 10-56 – Added a second DETAIL J to match what is currently shown on standard plate 630.50.

Page 10-58 – Updated DETAIL J to match what is currently shown on standard plate 630.52.

Page 10C-2 – Updated the AASHTO webpage link and MASH Q & A information.

Throughout the chapter, minor edits were made to ensure consistency and conciseness.
