

Public Information

Project Location: S.D. Highway 10 - Sisseton from 8th Avenue East to 460th Avenue/County Highway 1

Project Description: Urban Grading, AC Surfacing, Pedestrian Bridge Structure, Curb & Gutter, Lighting, ADA, Storm Sewer, LSDC Overlay, Approach Slabs, Sidewalk, PCC Shared Use Path

Project Number: P 0010(165)359, Roberts County, PCN 0804

Structure # 55-093-190

Public Meeting Information @

https://dot.sd.gov/projects-studies/projects/public-meetings#listItemLink_2051

The South Dakota Department of Transportation gives public notice of its policy to uphold and assure full compliance with the non-discrimination requirements of Title VI of the Civil Rights Act of 1964 and related Nondiscrimination authorities. Title VI and related Nondiscrimination authorities stipulate that no person in the United States of America shall on the grounds of race, color, national origin, religion, sex, age, disability, income level or Limited English Proficiency be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance.

Any person who has questions concerning this policy or wishes to file a discrimination complaint should contact the Department's Civil Rights Office at 605-773-3540.

S.D. Highway 10 in Sisseton

Project Number: P 0010(165)359
Date: Thursday, Sept. 18, 2025

Brandon Riss
Road Design Engineering
Manager

1

Mission Statement

We provide a safe and efficient public transportation system.
<https://dot.sd.gov/>

2

Purpose of the Meeting

Involve the public in the planning and design process

Provide a project overview

Gather input and comments

✓ Background information
 ✓ Proposed project
 ✓ Project schedule

3

Project Limits

4

Background Information

Grading and structures in 1980

Asphalt surfacing in 1989

Mill and Overlay in 2003

5

Traffic Data and Information

2023 Average daily traffic (ADT): 4,537

2048 Projected ADT: 9,937

7.0% Average truck traffic

6

Crash History

7 Reported crashes
(Five-year period from 2020-2024)

- Two (2) rear end crashes
- One (1) run off road
- One (1) angle intersection crash
- One (1) swipe crashes
- One (1) pedestrian hit
- One (1) other crash
- Zero (0) fatalities

Urban minor arterial

- Weighted crash rate = 0.72
- Statewide weighted crash rate = 1.89 (crashes per million vehicle miles of travel)

7

Why This Project is Needed

8

Proposed Urban Improvements

9

Proposed Rural Improvements

10

Proposed Typical Section

Urban 3 Lane
8th Avenue East to SD127

11

Proposed Typical Section

Urban 3 Lane
SD127 to Lake Traverse Drive

12

Proposed Typical Section

13

Three-Lane Roadway Advantages

- Traffic analysis – greatest benefit/cost ratio
- Capable of safely and efficiently handling 20,000+ vehicles/day
- Provides safe storage for left turning vehicles
- Reduces the number of conflict points for left turning vehicles and for vehicles entering the roadway
- Reduces the speed differential between vehicles
- Boulevard provides snow storage
- Reduces crossing width for pedestrians

14

Proposed Right Turn Lanes

459th Avenue

15

Proposed Right Turn Lanes

Lake Traverse Drive

16

Proposed Pedestrian Facilities

17

Proposed Pedestrian Bridge

18

Roadway Lighting

Replace
existing
lighting:

- LED

19

Access Management

Manage location and number of access points.
Provide safe, efficient access to streets and highways by
relocating, combining, and eliminating access points.

✓ See handout

20

Right of Way (ROW)

Existing Width

Urban: 100 feet (50 ft from centerline)
Rural: varies 100-175 feet (total width)

Purchase additional ROW as needed
(very limited ROW needed)

Temporary easements as needed

See handout

21

Encroachments

Private
property in
public ROW

Federal highway
regulations for safety

Examples

- Signs
- Private use (parking)
- Landscaping

Notification

Owners of
encroachments will be
notified by the
Mitchell Area Office.

See handout

22

Utility Coordination

Some utilities may need
to be relocated.

Utility companies
negotiate easements
with landowners.

- Venture Communications Cooperative
- Otter Tail Power Co.
- Whetstone Valley Electric Cooperative, Inc.
- City of Sisseton

See handout

23

Utility Coordination

Any known
private utilities?

- Water lines
- Drain fields
- Septic tanks
- Underground storage tanks
- Underground power lines

Contact SDDOT

See handout

24

Environmental, Social, and Economic Concerns

This project is being developed in accordance with applicable State and Federal environmental regulations.

- **National Environmental Policy Act of 1969 (NEPA), as amended.**
- **Section 106 of the National Historic Preservation Act**
 - Section 106 of the National Historic Preservation Act requires Federal actions to take into account the effects of project undertakings on historic properties. This includes: districts, sites, structures, and objects. This will also include tribes that may attach religious or cultural importance to them. Section 106 consultation will be initiated with the Sisseton-Wahpeton THPO and SHPO. **The public is invited to provide information on any culturally or archaeologically known site(s).**

25

Environmental, Social, and Economic Concerns (Slide 2)

- **Section 404 of the Clean Water Act**
 - Federal regulations require that unavoidable wetland impacts caused by highway construction be mitigated. If you are interested in creating or restoring wetlands on your property, please complete the Wetland Mitigation Registry Form in the handouts.
- **Section 4(f) of the USDOT Transportation Act of 1966**
 - Project action will include all possible planning to avoid and minimize harm to publicly owned parks, recreational areas, wildlife & waterfowl refuges, or public & private historical sites. An evaluation of possible project effects on Brewster/Gunderson Field is being done with project.

26

Environmental, Social, and Economic Concerns (Slide 3)

- **Section 7 of the Endangered Species Act**

The U.S. Fish and Wildlife Service will review the project to determine if it will impact the following species that are known to occur in Roberts County:

 - Birds: Rufa Red Knot & Whooping Crane
 - Mammals: Tricolored Bat & Northern Long-Eared Bat
 - Insects: Dakota Skipper, Monarch Butterfly, & Western Regal Fritillary
 - Plants: Western Prairie Fringed Orchid
- Efforts are proceeding to ensure this undertaking will not adversely affect listed species**

27

Construction Traffic Control

28

Landowner Meetings

Fall/Winter 2025

Landowners adjacent to the project will be contacted individually by SDDOT to schedule a meeting.

Discussion Items

- Driveway locations/widths
- Sidewalk and curb ramps
- Fences
- Drainage
- Trees
- Temporary easements or ROW acquisition

29

Tentative Project Schedule

Dependent on federal funding

Estimated cost: \$13.2 million

30

Questions or Comments

- Deadline: Friday, Oct. 3, 2025
- Submit To:
Brandon Riss
South Dakota Department of Transportation
5316 W 60th St N
Sioux Falls, South Dakota 57107
Brandon.Riss@state.sd.us

Access Management

South Dakota's Commitment to Safety and Smart
Investment Decisions in Transportation

What is Access Management?

Access Management is the process of providing highway entrances only at locations where they can be provided safely and efficiently.

Consider that each access point added to an undivided highway in an urban or suburban area increases the annual crash rate by 11 to 18 percent on that highway segment. In rural areas, each added access point increases the annual crash rate by seven percent. Overall, driveway-access crashes alone cost South Dakota approximately \$36.5 million each year.

Each additional access point also contributes to congestion. The more driveways on a street the more places where people are slowing, changing lanes, and turning. A five-lane street can quickly become a parking lot when there are many driveways in each block. When that happens, our valuable transportation investments are wasted and access to adjacent businesses is restricted.

Controlled access facilities are segments of highway where either no access or only limited access to the highway is allowed. Interstate highways are an example of controlled access facilities where no access to the highway is allowed.

Good access depends on the following:

- Limiting the number of conflict points (places where there is a potential for crashes)
- Separating conflict areas
- Reducing interference with through traffic
- Providing good on-site circulation and storage
- Properly spaced traffic signals

How does Access Management affect businesses?

Studies have shown that access management can provide three benefits to businesses adjacent to highways:

- Making sure that drivers can get in and out of businesses without being blocked by other traffic
- Making the highway more attractive by reducing congestion
- Extending the business' effective service area by reducing travel times

These benefits come not from having many driveways, but by having well-planned, well-located, high-capacity access points on the highway.

Even skeptical business owners have found that proper access management results in an improved business climate, as customers can easily get in and out of their business establishment.

For more information, please contact:

Joe Sestak
Access Management Engineer
1306 West 31st Street
Yankton, SD 57008
Phone: (C) 605-661-2255 (O) 605-668-2929 Ext. 1302007
E-Mail: Joseph.Sestak@state.sd.us

Right of Way Information

Individual Landowner Meetings

During the early stages of the project's design, SDDOT will schedule a meeting with individual landowners having property adjacent to the project. See the following page for an explanation of the landowner meeting.

Property Acquisition Offer

After the project construction plans have been prepared and the right of way limits have been established, you may be contacted by an appraiser or negotiations agent to visit with you for that portion of your property that is needed for construction of the project. Your property will be valued, and a written offer presented to you by a negotiating agent who will contact you for an appointment to make the written offer.

Relocation Assistance Program

This program provides a variety of services and payments to owners and tenants who have personal property affected by the right of way being acquired for the project.

Relocation payments are in addition to payments made for the real property being acquired. To preserve your eligibility for payments, do not move property until you have received a written relocation offer or have contacted John Keyes of the SDDOT Right of Way Program in Pierre. His phone number is 605-773-3746. Anyone not satisfied with the relocation offer made to them may appeal using the procedures described in the Relocation brochure.

The landowner may be reimbursed for various fair and reasonable incidental expenses that may be incurred during the transfer of property to the State depending on impacts to personal property and qualifications.

Right of Way Information Brochures

Two brochures "Better Roads brochure" and "Relocation Assistance brochure" have been prepared which explain the SDDOT's Right of Way process. They provide information on your rights regarding the acquisition of your property and the benefits available to you with regard to the Relocation Assistance Program. These brochures are available at this meeting on the "Sign-in" table. Please feel free to take a copy of each with you. These brochures are available at the following SDDOT website: <https://dot.sd.gov/inside-sddot/forms-publications/brochures>

Individual Landowner Meetings

The purpose of this meeting is to provide you with an opportunity to comment on various issues pertaining to the design of this highway project as it relates to your property.

The following topics will be discussed at the meetings. Please note that not all topics will apply to every property owner.

- Permanent purchase and/or temporary use of your property.
- Locations and widths of entrances to your property: The standard South Dakota Department of Transportation (SDDOT) entrance-width for rural highways is 24 feet. Note: In general, existing entrance widths along rural State Highways are 24 feet or smaller. A maximum width of 40 feet is allowed at locations where it is deemed appropriate and necessary. Entrances in urban areas can vary from 16 feet to 40 feet.

The goal of the SDDOT is to provide property owners located adjacent to the project with the access they need, and at the same time, enhance highway safety and reduce project costs. In some instances, the SDDOT may seek to combine duplicate entrances. For example, if your property has two or three entrances to the same property that are located close to each other, we would ask you to assess your current entrance needs and consider one entrance location that will meet those needs.

- Permanent fencing adjacent to the highway: SDDOT's fencing policy allows for the replacement of all disturbed fence with like-kind fence.

Two fence types are typically installed: **Type 2:** 4-strand barbed wire with 8-inch wire spacing, and **Type 6:** 32-inch woven wire with 1 strand of barbed wire on the bottom and 2 strands of barbed wire on the top. Page 12 of the "Better Roads brochure" contains added discussion of your permanent fencing options. This brochure will be available at the meeting.

- Temporary fencing adjacent to the highway: Do you anticipate having livestock in pastures located adjacent to the proposed project during highway construction activities?
- Are you aware of any waterlines, drain fields, septic tanks, underground storage tanks, underground power lines, etc. that are located adjacent to the project and may be impacted by construction activities?
- Are there any highway-related drainage or flooding problems located along your property or elsewhere along this section of highway?
- Possible sites for gravel and additional fill material: Are you aware of potential material available for construction that might be located adjacent to the highway?
- Temporary access during construction activities.

Please review your property and be prepared to discuss the above issues, as well as any other issues that you feel are unique to your property. No offers to acquire property will be made at these meetings since revisions to the plans may occur from your input.

Encroachments in ROW

Federal Regulations (CFR 23.1) require that the State Highway Department (SDDOT) will be responsible for preserving such ROW free of all public and private installation, facilities, and encroachments.

No improvements shall be allowed to remain in the ROW unless they are deemed in the best interest of the public and will not impair the highway or interfere with the free and safe flow of traffic.

Encroachments are any private property or improvement in the public ROW that is not approved by permit such as:

- Landscaping items
- Fence
- Signs
- Buildings
- Etc.

SDDOT Staff will survey the project limits to identify all encroachments. Prior to the project being let to contract, landowners will be contacted by the SDDOT or City Government regarding how each encroachment will be addressed or handled. If it is determined that the removal of an encroachment is required, it will be the landowner's responsibility to remove the encroachment.

For additional information, please contact:

Matt Brey
Area Engineer
SDDOT Watertown Area Office
5000 U.S. Highway 212
Watertown, SD 57201
Phone: 605-882-5166
E-Mail: Matt.Brey@state.sd.us

Environmental, Social & Economic Impacts and Advanced Utility Coordination

Environmental, Social & Economic Impacts

- Project will comply with all state and federal environmental regulations.
- No splitting of neighborhoods will occur because of this project.
- Project will be coordinated with the following state and federal agencies:
 - SD Dept. of Environment & Natural Resources
 - SD Dept. of Game, Fish & Parks
 - US Fish & Wildlife Service
 - State Historic Preservation Office
 - US Forest Service
- For additional information, please contact:

Chad Babcock
Environmental Manager
SDDOT Office of Administration
700 East Broadway Avenue
Pierre, SD 57501
Phone: 605-773-3721
E-Mail: Chad.Babcock@state.sd.us

Advanced Utility Coordination

Highway projects may require adjustments or relocation of existing utilities located along or crossing the highway project. The SDDOT has an "Advanced Utility Coordinating Process" in place that addresses all existing utility involvement. This process involves meeting with the utility owner and project designers to **review** any conflicts and determine the most cost-effective option of changing the design to avoid the existing utility or adjusting the utility. If the utility is required to relocate, all replacement utility easement acquisition and relocation work will be addressed and coordinated between the landowner and the utility company.

- For additional information, please contact:

Will Hylton
Utility Coordinator
SDDOT Office of Road Design
1300 South Ohlman Street
Mitchell, SD 57301
Phone: 605-773-4426
E-Mail: Will.Hylton@state.sd.us

Wetland Mitigation Registry Form

Federal regulations require that unavoidable wetland impacts caused by highway construction be mitigated. Examples of acceptable wetland mitigation include:

- Wetland creation
- Wetland restoration – plugging an existing, drained wetland.
- Wetland enhancement - adding buffer around an existing wetland.

The South Dakota Department of Transportation (SDDOT) may participate in the cost of wetland creation/restoration/enhancement, if the wetland can be used to mitigate wetland impacts caused by highway construction.

If you are interested in creating, restoring, or enhancing wetlands on your property, please complete the attached form and mail to:

Chad Babcock
Environmental Manager
SDDOT Office of Administration
700 East Broadway Avenue
Pierre, SD 57501

Your name will be added to the SDDOT Wetland Mitigation Registry and a SDDOT representative will contact you with additional information.

Yes, I am interested in assisting the SDDOT to mitigate wetland impacts by creating or restoring wetlands on my property.

Name: _____

Address: _____

Phone #: _____ **Email:** _____

Location of property: _____ **1/4 of Section** _____

Township _____, **Range** _____, **County** _____

Please note: Completion of this form does not commit either you or the SDDOT to a mitigation project. It is a statement of interest only.
