RE: State of South Dakota National Electric Vehicle Infrastructure Deployment Plan 2025 Update

The South Dakota Department of Transportation (SDDOT) 2025 update to its Electric Vehicle (EV) Infrastructure Deployment Plan as required by National Electric Vehicle Infrastructure (NEVI) program guidelines as reflected below addresses the 3 Statutory and Regulatory requirements in the NEVI Formula Program Interim Final guidance provided on August 11th, 2025 from FHWA.

The 2024 State NEVI plan will be used as a basis/guide for the below requirements:

A description of how the State intends to use the funds for each fiscal year. The Plan should cover all unobligated funding 2022-2026.

1. SDDOT anticipates re-evaluating the placement of EV Chargers that will allow AFC Corridor Build Out and determination of "Corridor Ready" for the State of South Dakota upon approval the updated plan.

A Community Engagement Outcome Report, per 23 CFR 680.112(d)

2. There are no changes to **Community Engagement** (Page 1-2 of 2024 NEVI Plan, [South Dakota Electric Vehicle Infrastructure Deployment Plan 2024 Update](#)).

A description of physical and cybersecurity strategies, per 23 CFR 680.106(h).

3. There are no updates to **Cybersecurity** (Page 9 of 2024 NEVI Plan, [South Dakota Electric Vehicle Infrastructure Deployment Plan 2024 Update](#)).
