

Section D – Erosion Control Notes have been updated.

On Sheet D6, the **MULCHING (GRASS HAY OR STRAW) FOR TEMPORARY STABILIZATION** note was revised. The 2nd sentence of the 1st paragraph was incorrect/no longer relevant and was removed. The following is the text that was removed: "Two applications of Grass Hay or Straw Mulch on areas that receive temporary Grass Hay or Straw Mulch will not be required if the Engineer determines that there is sufficient Mulch remaining at the time permanent seeding takes place".

Section D – Erosion Control Standard Note file may be downloaded from [here](#).
